

CONTENTS

I. Policies, strategies and programmes for SB vs. Energy Performance Directive

- 68.* Sochacki M. Sustainable construction in the countries of central Europe – conditions of development
80. Pogorzelski J. An outline of a program for sustainable development of construction in Poland
35. Schilken P. "Display" - the European Campaign for the display of information on the CO₂ and energy performance of municipal buildings, 2003-2005
66. Kyvelou S., Bidou D. Sustainable construction towards sustainable development: strategies, policies and actors in the Mediterranean Region
79. Vingerling H., Hendriks N. Strategies for the sustainable renovation of apartment buildings
03. Tetior A. Conception of "program of sustainable building" for Russia
26. Lollini R., Meroni I. Building-plant complex performance analysis strategies aimed at the environmental sustainability
25. Laing R., Paterson G., Taylor S. Objects and Process Integration for Sustainable Construction
20. Korolczuk D., Szewczyk J. The problems of sustainability of regional settlement space in North-Eastern Poland
01. Matrosov Y. Recent Advances in Energy Codes in Russia and Kazakhstan. Harmonization of Codes with European Standards
19. Karbauskaite J., Gilius A. Assessment of building maintenance effectiveness on energy consumption and environment pollution decrease

II. Economy of SB. Training and education for design, construction and operation

40. Malinowski M., Kujawski W. Time is money. Quite important lesson on sustainability for emerging market economy
51. Panek A., Trzaski A. Setting energy performance requirements
44. Sellier D. Use of economic instruments for sustainable construction and challenges for 2010 in Paris region
45. Bohdanowicz P., Simanic B., Martinac I. Sustainable Hotels – Eco-certification according to EU Flower, Nordic Swan and the Polish Hotel Association
13. Gonzalez M. J., Navarro J. G. Examination to the additional costs for the construction of low environmental impact houses: a real case of study
60. Rovers R., Pogorzelski J. Designing the "improved architect"
02. Tetior A. Rethinking ecological education for successful sustainable building
10. Buvik K. J., Ryńska D. Sustainable development through education
46. Bohdanowicz P., Simanic B., Martinac I. Environmental Education at Scandic Hotels – Approach and Results

* Number of paper

III. Environmental impact assessment of buildings

27. Lützkendorf T., Lorenz D. Integrating the concept of "environmental performance" into decision making processes along the life-cycle of buildings
63. Panek A. Evolution of views on sustainable buildings
55. Belindževa-Korkla O., Krēslinš A. Conception of building energy frame in Latvia
56. Heim D., Narowski P., Wiszniewski A. Energy demands factor for office building as a function of occupancy
09. Bromberek Z. Environmental impact assessment: Developing Building Site Disturbance Indicator
32. Pollo R., Rivotti A. Building Sustainability Evaluation in the Building Process: the construction phase
64. Górczyński J. Methods of determination of cumulative environmental impact in product manufacturing
65. Górczyński J., Prejzner H., Piasecki M. Environmental profile of building elements made from various materials
11. Ciampi B., Giordano R., Revellino P. The evaluation of eco-compatibility projects expected within the strategic environmental assessment of the XX Olympic Winter Games Torino 2006
67. Hendriks N., Nunen H., Erkelens P. Application of the improved factor method to the environmental impact assessment of buildings
15. Hajek P., Vonka M. Environmental analysis of residential buildings - life cycle assessment
22. Kisilewicz T. Direct Passive Solar Use

IV. Assessing the environmental performance of buildings and their urban neighbourhoods

74. Desmyter J., Putzeys K., Adams W. The PRESCO Guidelines for Sustainable Buildings
31. Peretti G., Grosso M. The Italian national standard approach to assessing ecocompatibility of building design
75. Peupartier B., Kellenberger D., Anink D., Mötzl H., Anderson J., Vares S., Chevalier J., König H. Inter-comparison and benchmarking of LCA-based environmental assessment and design tools
39. Struck Ch., Tarczyński P., Stigge B., Wright S. A review of environmental building performance assessment methods and their performance on a typical Polish development
52. Andresen I., Aschehoug O., Panek A., Pracki P., Ryńska D., Sowa J. SURE-BUILD Polish/Norwegian cooperation for sustainable redevelopment of buildings in Poland
62. Kwiatek J., Muszyński L. Problems of structure protection in mining and post-mining areas
69. Nurzyński J. Sustainability and protection against noise in a building and its surroundings
18. Karbauskaite J., Stankevicius V., Bliudzius R. Potential of energy consumption decrease in historical buildings
28. Matusiak B., Pracki P. Luminous environment in school buildings

17. Juodvalkis J., Blaževičius E., Vipartas R. Methods of unstable heat transfer regime analysis and of power estimation

V. Controlling and assessing the environmental performance of building materials

30. Mötzl H. Natureplus - controlling and assessing the environmental performance of building products by an international label of quality

37. Sodagar B., Tuite C., Duignan A., Sychala D., Chaina Ch. Innovative Materials

54. Deilmann C. With luxury and abundance towards sustainable buildings

06. Schmidt A., Clausen A. U., Kamstrup O., Jensen A. A. Life cycle assessment of three insulation materials: stone wool, paper wool and flax cellulose

16. Huber R. Environmental assessment of management options of the urban mineral building material stock

38. Stankevicius V., Sadauskiene J., Monstvilas E. Effect of water vapour conductivity of external finish of building enclosures on moisture behaviour of external thermal insulation composite systems (ETICS) based on mineral wool

48. Kwapisz H. The application of LCA methodology to assess SAINT-GOBAIN ISOVER POLAND products

41. Tavit A., Altun C. M. A case study of energy efficient window system design for a renewal of a historical building

VI. Regional best practices (case studies)

23. Kujawski W. Canadian best practices in sustainable retrofit design

57. Sunikka M. CO₂ reduction in post-war housing: costs, benefits and policy implications

50. Andresen I., Panek A. Criteria for environmental assessment of school buildings in Poland and Norway

47. Kolbasenko T. Adaptive reuse of old school building into sustainable campus: The renovation and addition to the Canadian Memorial Chiropractic College in Toronto: a case study in sustainable adaptive reuse

49. Göhring A. The 3-liter-house an innovation in the modernization of old properties

07. Dzelzitis E., Osis U. Assessment of Riga district heating rehabilitation project in aspects of energy savings

71. Osika K., Schneider B. Sustainable rehabilitation of monument protected buildings. Living starts on the street

72. Rylewski E. The sustainable office building

58. Domaradzki K. New urban development and living conditions. Problems of balanced development in town planning

61. Kawulok M., Wuwer P. Problems of sustainable development in mining areas

73. Podwojewska M., Stawicka-Wałkowska M. Modernization and extension of dwellings as a source of full value dwelling space in the aspect of sustainable management of dwelling

resources in Gdansk

VII. Miscellaneous SB issues

43. Deilmann C. Urban structural unit approach to model future land-use and resource-consumption for housing - The German Housing Stock 2025
04. Tetior A. "Sustainable building" concept and binary plurality of world
08. Affelt W. Safeguarding of the cultural heritage during redevelopment projects
14. Femenias P. Demonstration Projects: An Effective Strategy for Sustainable Building?
21. Korolczuk D., Szewczyk J., Computer-Aided heritage management for sustainable, heritage-responsible architecture
24. Kryvosheyev P., Kozeletskyy P. Scientific support of works on assessment of technical state and overhaul period renewal of the important construction objects
29. Mikoś-Rytel W. Eco-architectural issues of sustainable buildings
33. Ralevic M., Djukic A. Procedures, methods and models of individualization of multistory and apartment houses urban structure. Case study – Serbia and Montenegro
59. Stawicka-Wałkowska M., Felski B., Ptaszyński M. Aspects of sustainable development in shaping the infrastructure of inland waterway transportation: the case of Toruń
76. Wołoszyn M. Implications in architectural design of downtown blocks revitalization according to sustainable development
77. Świątek L. Modern earth building for promoting regional development under the Action Programme Leonardo da Vinci
78. Czarnecki L., Pluta J., Pluta K. The ecological solutions of the composite floor structures and dense perforated concrete walls
70. Grodzicka A., Siemaszko-Lotkowska D., Józwiak H., Kon E. Concrete production in the aspect of sustainable development principles
36. Snarskis B., Galvonaitė A., Šimkus R., Doveika V. Some problems of structural design codes referring to atmospheric actions as problems pertinent to the environmental framework assessment
12. Cripps A. The potential for the use of crop based materials in construction
05. Girshel G. B., Kirichenko I. O., Eine I. A. Environmentally appropriate high strength and heat-insulating concretes for construction of high-rise buildings
81. Wysokiński L., Świeca M. The role of geotechnics in "sustained development" of building industry in Poland
82. Witkowski B. Osaka suspended gardens
